

National Cycling Strategy  
PETITION TO THE HOUSE OF COMMONS OF CANADA

WHEREAS:

- Cycling is one of the most sustainable methods of transportation, requiring fewer natural resources and producing less waste than any other transport alternative;
- The benefits of cycling should be made available to all Canadians, regardless of age, ability, gender, economic status or location;
- A national cycling strategy would promote research, help create infrastructure projects and establish a clear framework for investment in order to support and increase all types of cycling in Canada, including: commuter, tourism and recreational cycling;
- Cycling plays a positive role in healthy lifestyles and reduces healthcare spending as a result of increased physical activity and fitness;
- A national cycling strategy would enhance national safety standards including measures like mandatory side guards for trucks.
- Increased cycling would support Canada's goals to reduce greenhouse gas emissions.

**We, the undersigned residents of Canada, call upon the House of Commons to establish a National Cycling Strategy.**
